

Ideation Phase

Empathize & Discover

Date	17 July 2026
Team ID	
Project Name	SB Stocks — MERN Stack Stock Trading Simulation Platform
Maximum Marks	4 Marks

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps the team understand the true problem and the person experiencing it, by considering the user's perspective along with his or her goals and challenges.

Empathy Map Canvas: SB Stocks

Persona: Karthik, a student and first-time investor using SB Stocks to learn stock trading with virtual capital before ever risking real money.

SAYS • “I want to see how stocks move without risking my own money.” • “I just want a clean dashboard, not a cluttered trading terminal.” • “I like seeing my gains and losses right away.”	THINKS • Will I actually understand real trading mechanics from this? • Is the live price data trustworthy and up to date? • Am I buying or selling at a good time?
DOES • Checks the dashboard daily for top gainers and losers • Buys shares (e.g., AMZN, MSFT) to test small ideas • Switches between candlestick and 1Y trend chart views before trading • Reviews the order book and wallet ledger after every trade	FEELS • Curious and motivated to learn about the market • A little anxious when a position shows a loss (e.g., – 23%) • Reassured knowing it is virtual money, not real capital • Increasingly confident to keep experimenting with new trades

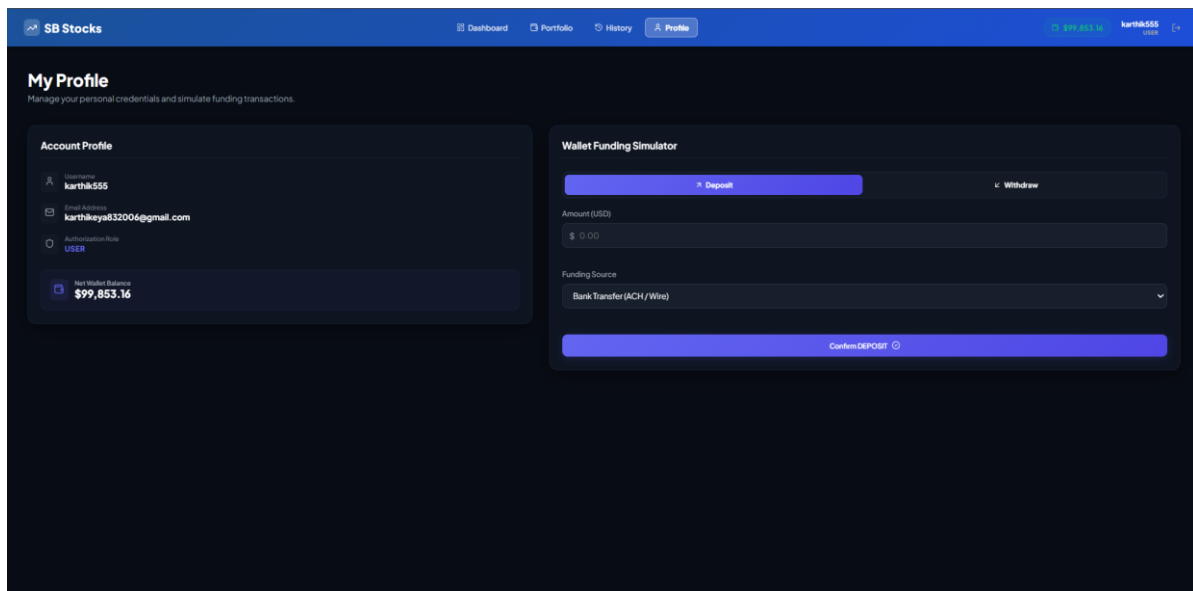

Goals & Challenges

Goals

- Understand how buying and selling stocks affects a portfolio in real time
- Build confidence in reading price charts and market movement before trading with real money
- Keep track of overall net worth, holdings, and past trades in one place

Challenges

- No prior brokerage account or trading experience
- Limited real capital to experiment with risk-free
- Finds most professional trading terminals overwhelming and hard to read

Karthik's account view in SB Stocks — virtual wallet balance and a simple funding simulator that removes real financial risk.
