

Project Design Phase

Problem — Solution Fit

Date	17 July 2026
Team ID	
Project Name	SB Stocks — MERN Stack Stock Trading Simulation Platform
Maximum Marks	2 Marks

The Problem–Solution Fit simply means that a real problem has been found with the customer, and that the solution built for it actually solves that problem. It helps identify behavioural patterns and recognize what would work, and why.

Purpose

- Solve complex problems in a way that fits the state of the customer.
- Succeed faster by tapping into existing mediums and channels of behaviour.
- Sharpen communication and messaging with the right triggers.
- Increase touch-points by finding the right problem–behaviour fit and building trust.
- **Understand the existing situation in order to improve it for the target group.**

Problem — Solution Fit Canvas: SB Stocks

Customer Segment(s) • College students & first-time investors • Finance/commerce students studying markets • Hobbyist traders wanting to test strategies	Problems (Top 3) • Fear of losing real money while learning to trade • Complex onboarding (KYC, funding) on real brokerages • Existing paper-trading tools are too basic or too complex	Existing Alternatives • Manual spreadsheet-based paper trading • Demo accounts on real brokerage apps • Paid trading courses with little hands-on practice
Trends • Rising retail investor participation, especially among students • Growing appetite for gamified, easy-to-use fintech apps • Increased interest in learning markets before investing real money	High-Level Concept • “A risk-free, real-time stock trading simulator for new investors” • “Learn to trade the way real markets move — with zero financial risk”	Proposed Solution • SB Stocks: a MERN stack web app with a \$100,000 virtual balance • Live price feed, Buy/Sell execution, portfolio & wallet tracking • Full order history and audit log for transparency
Existing Behaviour to Tap Into • Users already track price alerts and follow market news on other apps • Familiarity with dashboard-style fintech and banking apps	Unfair Advantage • Open-source, extensible MERN architecture built purpose-first for education	Adoption Strategy • Free access to remove all friction to first use • Partner with college finance clubs and student communities

	• Not weighed down by real brokerage compliance/KYC overhead	• Guided onboarding tutorial on first login
