

User Acceptance Testing (UAT)

Date	17 July 2026
Team ID	
Project Name	SB Stocks — MERN Stack Stock Trading Simulation Platform
Maximum Marks	[Add Maximum Marks]

Project Overview

Project Name: SB Stocks — MERN Stack Stock Trading Simulation Platform

Project Description: A web-based stock trading simulator that lets users track real-time market data, place buy/sell orders, and manage a virtual portfolio using a \$100,000 starting balance, without any real financial risk.

Project Version: v1.0

Testing Period: 10 July 2026 to 16 July 2026

Testing Scope

The following features and user stories were covered during this UAT cycle:

- User registration and login (authentication)
- Dashboard — real-time stock listing, top gainers/losers
- Stock detail view — candlestick, trend, and volume/spread charts
- Buy and Sell order placement and execution
- Portfolio — holdings, returns, and portfolio weighting
- History — order book and wallet ledger
- Profile — account details and wallet funding simulator (deposit/withdraw)

Testing Environment

URL/Location: http://localhost:3000 (local development build)

Credentials (if required): Username: karthik555 | Password: [Add Test Password]

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	New user registers an account	1. Open the signup page 2. Enter a valid email, username, and password 3. Submit the form	Account is created and the user is redirected to the Dashboard with a \$100,000 virtual starting balance	Account created successfully; Dashboard loaded showing Total Net Worth of \$100,350.88	Pass
TC-002	Registered user logs in	1. Open the login page	User is authenticated and	Logged in as karthik555;	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
		2. Enter registered email and password 3. Click "Continue Trading"	redirected to the Dashboard	Dashboard displayed correctly with live stock list	
TC-003	Dashboard shows real-time stock prices	1. Log in 2. Open the Dashboard 3. Observe the Real-time Market Stocks table	Live prices and % change are shown for each listed stock (e.g., AAPL, MSFT, GOOGL)	Prices and change % rendered correctly, e.g., AAPL \$472.85 (+0.88%), GOOGL \$86.64 (-1.37%)	Pass
TC-004	User places a Buy order	1. Select a stock (e.g., AMZN) 2. Enter quantity = 1 3. Click "Execute Buy Order"	Order is executed, cash balance is debited, and the stock is added to the portfolio	1 share of AMZN bought at \$183.25; available cash updated to \$99,853.16	Pass
TC-005	Buy order exceeding available cash	1. Select a stock 2. Enter a quantity above the Max Buyable limit 3. Attempt to execute the order	System should block the order and prevent execution beyond available funds	Execute button remained disabled once quantity exceeded the Max Buyable value (211 shares)	Pass
TC-006	Portfolio reflects trades accurately	1. Open the Portfolio page 2. Review the Asset Positions table and Portfolio Weighting chart	Holdings, average purchase price, market value, and returns are calculated and displayed correctly	AMZN and MSFT holdings shown with accurate returns (-22.79% / -23.16%) and weighting chart	Pass
TC-007	Trade and wallet history is recorded	1. Open the History page 2. Select the Order Book tab	All executed trades appear with symbol, order type, quantity, price, status, and timestamp	Both trades (AMZN, MSFT) listed as Completed with matching timestamps	Pass
TC-008	Wallet funding simulator (deposit)	1. Open the Profile page 2. Enter a deposit amount 3. Select a funding source 4. Click "Confirm Deposit"	Wallet balance increases by the deposited amount	Net wallet balance updated correctly after the simulated deposit	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Live stock prices lag by a few seconds during rapid, high-frequency refreshes	1. Open the Dashboard 2. Watch the ticker during a fast price change	Low	Open	Consider WebSocket-based streaming instead of interval polling for smoother updates
BG-002	Portfolio return % does not yet account for after-hours price movement	1. Hold a stock overnight 2. Check the returns figure the next morning	Medium	In Progress	Add after-hours price handling to the returns calculation logic

SB Stocks							
Trading Book & Audit History							
Complete verifiable audit logs of your executed equity trades and wallet ledger activities.							
Total Executed Orders 2 Trades		Buy Capital Invested \$646.84		Sell Capital Recovered \$0.00		Total Wallet Deposits \$500.00	
Order Book (2) Wallet Ledger (3)							
Executed Equity Trading Orders							
SYMBOL / COMPANY	ORDER TYPE	PRODUCT OPTION	SHARES COUNT	PRICE PER SHARE	TOTAL PRICE	ORDER STATUS	TIMESTAMP
AMZN Amazon.com Inc.	BUY	Delivery	1	\$183.25	\$183.25	Completed	Jul 17, 02:17:40 PM
MSFT Microsoft Corp.	BUY	Delivery	1	\$463.59	\$463.59	Completed	Jul 17, 02:17:40 PM

Evidence for TC-007: executed AMZN and MSFT trades recorded in the SB Stocks order book with a Completed status.

Notes

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
